OTHER	
WEIGHT	How much does this bike weigh? It's a common question, and rightly so. But the truth is, there are no industry standards for claiming bike weights—and this leads to a lot of misinformation. Variances exist based on size, frame material, finish and hardware. And as bikes get lighter, these differences become more critical. At Giant, we believe the only way to truly know the weight of any particular bike is to find out for yourself at your local retailer.

## FRAME DESIGN

With a lightweight, competition-inspired ALUXX aluminum frame built to optimize its 100-millimeter suspension fork, Revel offers a stable, comfortable ride. From the same family tree as Giant's off-road performance bikes, it's outfitted with quality components that make it a reliable companion for whatever trail you choose.

- SR Suntour XCM V3 suspension fork
- Tektro I.O. disc brakes
- Giant Sport Alloy handlebar, stem and seatpost
- Colors: Black/Red, Silver/Blue
